YEARNING FOR THE OPEN ROAD

LETTER FROM THE PRESIDENT

Jim Chiavaras

President, Western Michigan Region

Well, there are not many new things to report since the shutdown has continued, other than more cancellations of future Porsche events.

At least we have been able to keep in contact with members via technology such as Zoom or FaceTime. I was recently contacted by Clyde from Euro Autowerks, regarding an alternative to the June 10th tech session that has been canceled. Tim is proposing mapping out a drive and having a box lunch at the end of the drive, unfortunately we have to wait until the restrictions have been lifted before scheduling such an event but it sounds like a great idea and we could still enjoy the company of fellow members while adhering to social/physical distancing.

Porsches on the Mac scheduled for July 31-August 2 is still a go for now.

So, for now we are continuing our sheltered lives in hopes of all staying healthy and trying to remain socially connected. There is an interesting write up in the June 2020 issue of Car and Driver on the new 718 Cayman GT4 and the changes that have been made which I urge you to read.

My heartfelt condolences go out to the family of our friend and fellow PCA member Ted Vogt who passed away on April 24, you will be missed. As always, stay healthy and I hope to see everyone soon.

All the best,

Jim

SILHOUETTE HISTORY

A LOOK BACK

INTO OUR PORSCHE PAST

BY CLUB HISTORIAN
CHUCK OLENYK

60 Years Ago

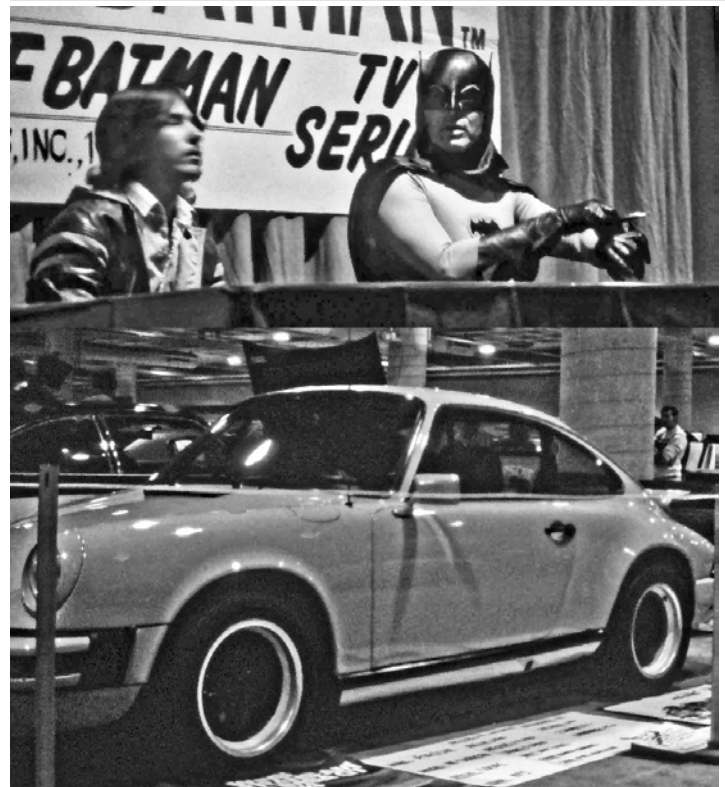

The RS 60 brought Porsche victory at the 1960 12 Hours of Sebring with a car driven by Hans Herrmann and Olivier Gendebien. 1960 also saw Porsche win the Targa Florio with Hans Herrmann being joined on the winner podium by Jo Bonnier and Graham Hill. The RS 60 also ensured that Porsche successfully defended their European Hill Climb Championship for the third year in a row.

40 Years Ago

MIR/PCA invited us to the Jose's Tequila Float Frolic at the Airport Roadway Inn, Indianapolis, Indiana. This grainy image is about all we (admit to) know about this event. Could it have been a "Tech" session given by member "Kayla" about adjusting the "float" levels of Jose's Webers? I don't remember Jose, he was not a friend of mine, but anyone with more understanding to what emerged, or submerged, please update.

40 Years Ago

The really bestest Batman, Adam West, signed autographs at the Grand Rapids Autorama. And Rick Riley displayed his "bat out of hell mobile", a car he still owns!

30 Years Ago

The Winterfest event was held at the Holland Holiday Inn Conference Center. Mount Rushmore has nothing on these, our greatest WMR Presidents of the 20th century. Or at least the ones who showed up at Winterfest that year. Doug Tepper, Bill Moses, Frank Wagner, and Craig Paull behind Rick Riley and Phil Cull.

As Historian, I would be very interested in any old "vintage" WMR material you still have. If you have old Über-Allles newsletters, articles, and especially photos or slides, would you consider letting me carefully scan and promptly return them? Email: olenyks@chartermi.net

Your June Tech Session

It's unfortunate that we found it necessary to cancel our annual Tech Session but we hope to continue it next year. We hope all of our WMR-PCA friends are staying well and looking forward to many great summer rides.

In spite of our cancellation, I thought it might be helpful to present this printed version of an issue we often see. IMS bearing failure happens and when it does, it can create havoc in your engine. Let's take a moment to take a look at a replacement that we just performed.

IMS Bearing Revisited

This is why we recommend replacing the IMF bearing if it has never been done. We caught this bearing just in time.

Note the IMS tube which runs from the front of the engine to the back. Oil only seeps into this tube, so fortunately almost all of the debris is still trapped inside.

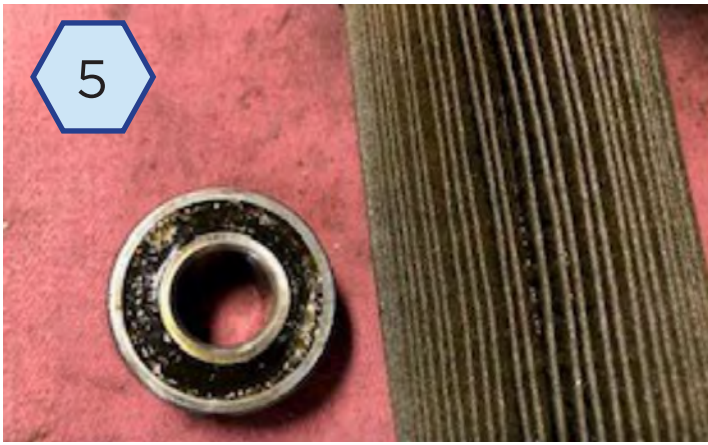

Here's the new bearing ready to be installed.

Here's some of the bearing material that was left in the IMS Bearing (shaft) Tube that we were able to recover.

5

You can see debris from this old bearing coming apart. Fortunately, the filter shows no large pieces in it.

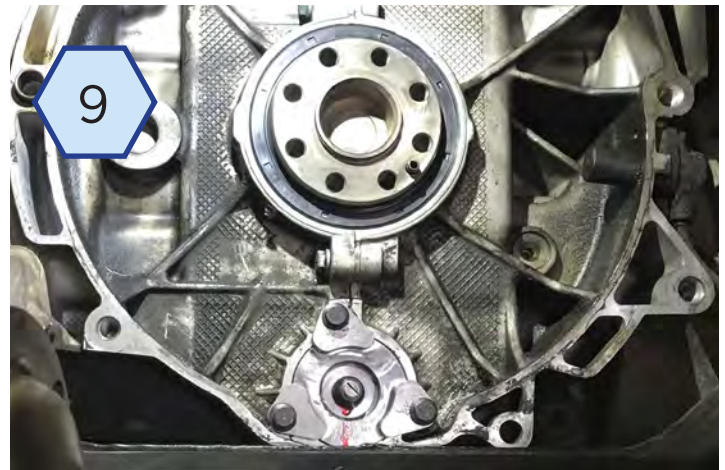

8

Note the new bearing installed into the IMF shaft tube.

6

With the oil pan off, the inside of the engine looks pretty clean, almost no sign of debris.

9

Here's the new bearing and housing installed.

7

Note the side baffles in the oil pan. They prevent the engine from being starved of oil during hard turns and cornering.

10

Well, the tech session is completed and under normal conditions it would be time to eat.

Hello Porsche fellows!

Our member Andy Boesky was sharing this photo of his 911 turbo X51. Beautiful it is.

If you have nice photos of your beauty don't hesitate to send them my way. It might not be right in the next release, but eventually it will surface in a future issue. Any related write-ups are appreciated as well.

Don't drive always alone, but stay safe.

SERVICE

"In the 10 years I have taken my cars to Euro Autowerks, Tim and his staff have never let me down. If you value excellent service, reasonable prices, impeccable honesty and a personal relationship with your technician, it's the place for you."
